The screenshot shows the Windows Server Manager interface. The left-hand console tree is expanded to 'DNS', showing a hierarchy: 'SERVER2016' > 'Forward Lookup Zones' > 'com' > 'linux' > 'win-iis'. The main pane on the right displays a table of DNS records for the 'win-iis' zone. The table has four columns: 'Name', 'Type', 'Data', and 'Timestamp'. A single record is listed with the name 'www', type 'Host (A)', and data '172.16.0.20'. Below the table, there are links for 'Events', 'Services', 'Performance', and 'BPA results'.

Name	Type	Data	Timestamp
www	Host (A)	172.16.0.20
